

Technical drawing of a circular mechanical assembly, likely a cross-section or plan view. The drawing includes various components labeled with numbers 1 through 27. Key features and dimensions include:

- Component 1:** The main circular body or housing.
- Component 2:** A central shaft or rod.
- Component 3:** A long, angled rod or lever arm.
- Component 4:** A curved, hinged arm or bracket.
- Component 5:** A small, rectangular component, possibly a sensor or actuator.
- Component 6:** A long, angled rod or lever arm, similar to component 3.
- Component 7:** A small, rectangular component, similar to component 5.
- Component 8:** A small, rectangular component, similar to component 5.
- Component 9:** A small, rectangular component, similar to component 5.
- Component 10:** A small, rectangular component, similar to component 5.
- Component 11:** A small, rectangular component, similar to component 5.
- Component 12:** A small, rectangular component, similar to component 5.
- Component 13:** A small, rectangular component, similar to component 5.
- Component 14:** A small, rectangular component, similar to component 5.
- Component 15:** A small, rectangular component, similar to component 5.
- Component 16:** A small, rectangular component, similar to component 5.
- Component 17:** A small, rectangular component, similar to component 5.
- Component 18:** A small, rectangular component, similar to component 5.
- Component 19:** A small, rectangular component, similar to component 5.
- Component 20:** A small, rectangular component, similar to component 5.
- Component 21:** A small, rectangular component, similar to component 5.
- Component 22:** A small, rectangular component, similar to component 5.
- Component 23:** A small, rectangular component, similar to component 5.
- Component 24:** A small, rectangular component, similar to component 5.
- Component 25:** A small, rectangular component, similar to component 5.
- Component 26:** A small, rectangular component, similar to component 5.
- Component 27:** A small, rectangular component, similar to component 5.

Dimensions and angles are indicated:

- 60:** Horizontal distance from the center to the end of component 14.
- 65:** Horizontal distance from the center to the end of component 21.
- 40:** Vertical distance from the center to the end of component 13.
- 60:** Vertical distance from the center to the end of component 14.
- 45°:** Angle between the horizontal axis and the rod component 3.
- 45°:** Angle between the horizontal axis and the rod component 6.

The drawing is a technical illustration showing the internal structure and components of a circular device, with various parts labeled numerically for identification.

Technical drawing of a circular mechanical part, likely a cross-section of a cylinder. The drawing includes the following dimensions and features:

- Overall Diameter:** 210
- Inner Diameter:** 180
- Section Line Angle:** 45°
- Internal Features:**
 - A central vertical slot with a width of 6.
 - Two rectangular blocks, each with a width of 8, located on either side of the central slot.
 - Four small circular holes, two on each block.
 - A horizontal slot with a width of 40 and a depth of 45, located on the left side.
 - Two U-shaped features, each with a width of 45, located on the left side.
- Labels:**
 - 14:** Points to the outer surface of the cylinder.
 - 15:** Points to the inner surface of the cylinder.
 - 24:** Points to the central vertical slot.

Przedsięwzięcie:		Przebudowa gminnej przepompowni ścieków "Radoszki główna (P2)" w Radoszkach gm. Bartniczka			
Objekt:		Gminna przepompownia ścieków			
Branża: sanitarna		Lokalizacja obiektu: Radoszki, gmina Bartniczka			
Inwestor:		Gmina Bartniczka, Urząd Gminy Bartniczka, ul. Brodnicka 8; 87-321 Bartniczka
